Seeding Rate 0.50 PLS Pounds Per 1000 Square Feet
 21.779 PLS Pounds Per Acre

Greenroof Ecology is a mix that has a high percentage of herbaceous plant species. Meadowfoam is the primary component of this mix, adding fireworks to the wildflower display in the spring and fall. With over 80% of the mix consisting of wildflowers and forbs, this mix does extremely well in poor, shallow green roof soils. Very drought tolerant and little need for synthetic fertilizer makes this mix is an excellent re-seeder.
