Upland Cover gives you a long bloom season with a wide variety of color, bloom and foliage. This mix designed to provide natural habitat cover mixture for upland game birds. Providing nesting material and cover from predators. Upland Cover will enhance the habitat for all game birds and provide the home they need to improve mortality and encourage nesting. Upland Cover is a native mixture that will enhance the habitat for many species. Cool season plots are important to help build up carbohydrates needed as stored fat to survive the harsh winter months. Maintaining good body conditioning through the rut and the winter season can mean the difference in a wildlife management program.
