MARSH

Sunmark Marsh Mix

Acres: 1
 Quantity: 21.56 lbs.

Botanical Name	Common Name	% by weight	Seeds per lb. of Mix	Seeds per lb.	Actual % by Seed Size	Lbs. Needed	Requested %
<i>Carex obnupta</i>	Slough Sedge	27.00%	115290	427,000	13.42%	5.8	15%
<i>Carex microptera</i>	Smallwing Sedge	25.00%	211675	846,700	24.65%	5.4	20%
<i>Carex stipata</i>	Awlfruit Sedge	29.50%	154875	525,000	18.03%	6.4	20%
<i>Eleocharis palustris</i>	Common Spikerush	15.00%	93000	620,000	10.83%	3.2	10%
<i>Scirpus microcarpus</i>	Panicled Bulrush	3.00%	204000	6,800,000	23.75%	0.6	25%
<i>Juncus tenuis</i>	Poverty Rush	0.50%	80000	16,000,000	9.31%	0.1	10%
TOTALS:		100.00%	858840		100.00%	21.56	100%

Seeding Rate

0.50 PLS lbs. per sq. ft.
 21.56 PLS lbs. per acre

MARSH is comprised of wetland species specifically suited to areas that are saturated with water, either permanently or seasonally. These wetlands take on characteristics that distinguish it as a distinct ecosystem. The primary factor that distinguishes wetlands is the plants that are adapted to the unique soil conditions. Marsh mix is best used on subsets of wetlands including swamps, marshes, and bogs. Wetlands play a number of roles in the environment, principally water purification, flood control, and shoreline stability. Marsh mix will add to the biological diversity of all wetland ecosystems, serving as home to a wide range of aquatic species and their unique needs.
