Dakota Grasslands Prairie is a native seed mix that has been designed as a salt tolerant phytoremediation upland habitat builder, combining winter-hardy drought-resistant prairie grasses that establish easily and provide excellent erosion control. Dakota Grasslands Prairie is a quick establishing seed mix for soil reclamation projects where a natural vegetated cover needs to be reestablished. Phytoremediation plants restore biological function in soils, cleaning up heavy metals and other pollutants. Excellent for highway roadsides and low rainfall areas, with very salt tolerant plant species.
